

GLOBAL BUSINESS
EXPANSION

WHAT IS GLOBAL BUSINESS EXPANSION?

With our comprehensive Global Business Expansion service, Mauve can set up every aspect of any new overseas operation on your behalf. Facilities, tax and legal considerations, staffing and more - Mauve takes care of it all. We advise on every step, from deciding the right type of business entity to

researching the new location, providing on-the-ground operational support and assistance with the company set-up itself - ensuring that every element of the new venture operates compliantly and translates completely. We make establishing your business in a new country easy.

We make going global easy!

KEY BENEFITS

LOCAL EXPERTISE

Our own global expansion has provided first-hand knowledge on the challenges of setting up overseas – and our services are supported by a market-leading network of local experts in fields such as accountancy, legal and compliance.

SAVE MONEY

An overseas project's success is measured by its profitability; using a Global Business Expansion solution makes a project more financially viable by saving unnecessary costs connected with incorrect set-up.

ENSURE COMPLIANCE

The entity type you choose should suit your activities and the laws of your target location. This solution ensures your new company complies absolutely with the legalities – allowing you to hit the ground running with peace of mind.

SAVE TIME

Without prior experience, finding the right route to market can be a lengthy process. When time is money, using a Global Business Expansion solution can optimise and expedite your set-up.

CASE STUDY - AIR-CONDITIONING COMPANY EXPANDING INTO BELGIUM

Mauve's client won a substantial contract of installation work in Belgium – a country in which they had no prior operations and needed to quickly employ 20+ members of staff. Through a Global Business Expansion solution, Mauve were able to provide a variety of recommendations for different provinces in Belgium, tailored to the client's current and future needs. The organisation opted to set up a local company; Mauve provided the consulting and administrative support to action this swiftly and compliantly. Mauve continues to remain on-hand to assist until such a time that winding-down operations are required.

BENEFITS TO CLIENT AT A GLANCE:

Rapid entry to new markets.

Security of over twenty-years' experience and expansion.

Peace of mind that the correct entity type has been chosen.

Ability to focus on their core business during the expansion process.

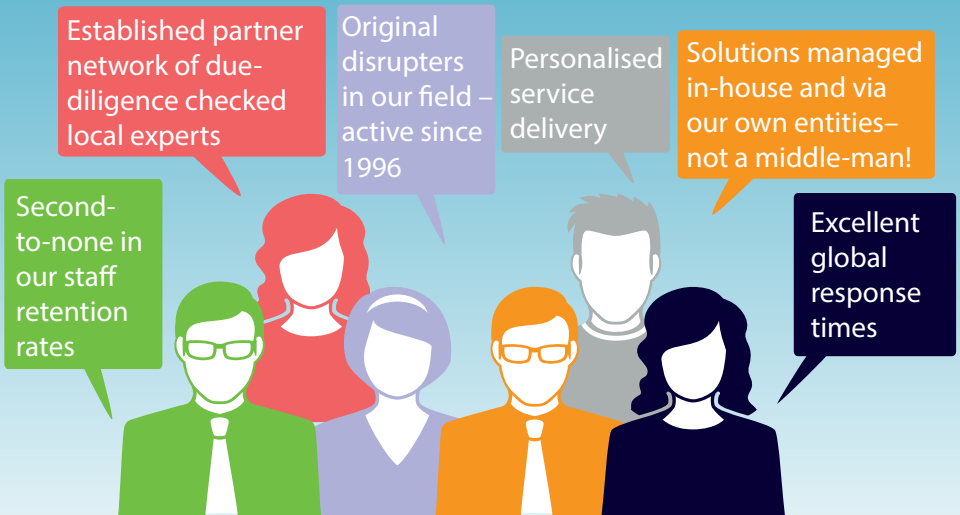

Solutions that are bespoke to their individual needs; never "off-the-shelf".

Knowledge that the entity set-up process has been actioned compliantly.

Access to professional in-country legal and fiscal partners with pre-negotiated rates.

WHY USE MAUVE?

Selecting the right global service provider is paramount to the success of an overseas project; in a busy marketplace, it is important to seek out the provider best suited to your organisation's ethos and goals. Since 1996, Mauve has focused on building a reputation and service portfolio that stands out from the crowd in six key ways.
